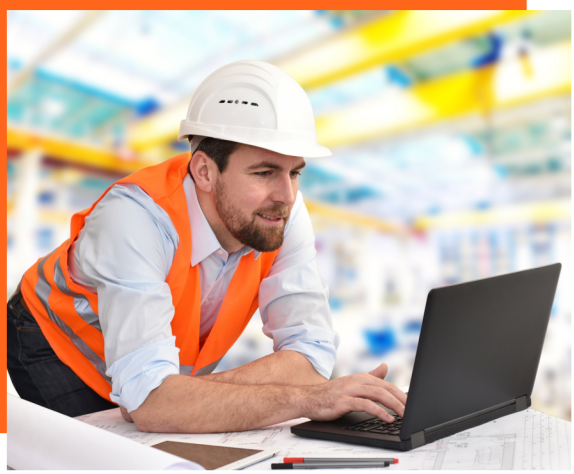
PAYMENT PROCESSING FOR INTEMPO ENTERPRISE

InTempo
POWERED BY
CURBSTONE



NATIVE, OUT-OF-THE-BOX INTEGRATION

Start processing payments right away. Curbstone is fully integrated with InTempo Enterprise. Online, over the phone, and at the rental counter, you'll have everything you need to accept credit cards, debit cards, and ACH payments. At the same time, you'll increase security and take your existing infrastructure out of scope for the most time-consuming PCI Self-Assessment Questionnaire.

FULL SUPPORT FOR ALL RENTAL TRANSACTIONS

Rental organizations process payments in a unique way - but you don't have to change your business processes to use our software. Our payment processing module is purpose-built for rental transactions - from recurring payments to new deposits on existing contracts.

CARD-ON-FILE BILLING

Keep payment details on file, without storing sensitive data on your system. Curbstone's Remote Tokens let you securely process recurring payments.

CYCLE BILLING

Update deposits as needed for cycle billing. Apply charges to your customers' card - without having to collect the information every single time.

CASH CUSTOMERS

Spend less time processing payments for your cash customers. You don't have to call them for their card number every time you need to run a charge.

REDUCE YOUR PAYMENT PROCESSING FEES

The way you process your transactions makes a significant impact on your fees - especially when you're billing contractors who use corporate purchasing cards. Curbstone helps you achieve the lowest possible rates through proven best practices, and we'll even help you access better rates through our network of merchant acquirers. You keep more of your hard-earned revenue.

POWERFUL NEW SOLUTIONS FROM YOUR EXISTING TEAM

Payments can be complicated - but with integrated payments for InTempo Enterprise, you don't have to deal with a third-party software vendor. We implement and support your new technologies in-house. Questions? Our US-based, 24/7 support team will walk you through until you find an answer - whether that's from your acquirer, your bank, or your EMV terminal provider.
